FOR IMMEDIATE RELEASE

Rogue Element Films purchases S.two digital film system for uncompressed production and post

Reno, NV 14th February 2008 – S.two Corporation has announced that Rogue Element Films, one of the UK's most progressive production companies, has become the first independent production facility to invest in a complete S.two uncompressed digital film production and post system.

As the UK's leading independent supplier of high end Digital Film services, Rogue Element Films is also known for exploring firsts in Digital Cinematography.

Due to unprecedented workload and demand Rogue Element Films is expanding into the world of full Feature Production and relocating to Pinewood Studios, UK, the home of the British Film Industry. *"The task of creating truly advanced digital feature films and the workflows involved falls to Rogue Element Films who have recently purchased S.two digital film equipment. S.two are at the forefront of digital film negative capture and use state-of-the-art data disk recording techniques," reveals Dan Mulligan, Managing Director at Rogue Element Films. "I believe that the future of digitally acquired images using fully uncompressed data digital film recorders is the way to go forward. S.two enables us to digitally capture each image as a full DPX frame—the digital negative—with zero compression.*

"The cornerstone of any digital shoot is to provide a successful workflow with an extremely efficient shooting process and S.two is integral in this process. Rogue Element Digital Film Productions look forward to a long partnership with S.two enabling us to deliver the benefits of digital film capture via DFR data recording to all our customers."

Steve Roach S.two VP Marketing added "This is another example of S.two providing a class leading complete solution for our uncompressed image capture. When this is combined with the security of electronic image handling we provide and ease of moving into editorial we are becoming the de facto standard within the digital film arena".

About S.two Corp. S.two Corporation is committed to reducing global emissions wherever possible. Our film-quality electronic data processes eliminate the need for traditional film and therefore the need for film processing which uses chemicals known to harm the environment. Reusable D.MAG™'s are the centerpiece of our industry-leading digital film workflow solutions while also being at the heart of our eco-friendly focus, allowing clients to support their green initiatives through virtually limitless re-recordings on removable disk magazines. S.two is the number 1 provider of uncompressed data recording products for digital movie production. Dozens of motion pictures and countless commercials and television programs around the world have benefited from the DFR™ D.MAG™ workflow and efficiency, saving customers millions of dollars.
